PREFACE

The collection of tables in this publication provides some major findings of Montserrat's Population and Housing Census of 2001. It is the first in a series of reports to be published highlighting the results of that exercise.

This is the culmination of many months of hard work and dedicated commitment by a range of individuals and agencies, to which the Department owes a debt of gratitude. These are listed on page 27. All of these persons provided the invaluable input essential to the design, development and successful completion of this huge undertaking.

The Census was designed and undertaken in concert with the Central Statistical offices of the countries, which constitute CARICOM and the wider Caribbean. This meant that the questionnaires for all countries were similar in content to allow for inter-country comparison of the resulting information. The Regional Census Office has oversight of the process in order to ensure consistency in its conduct and content.

The tables provide information on a variety of topics, which include economic activity, education, occupation and housing facilities, all of which are useful for development planning, research and general knowledge.

POPULATION FINDINGS

Chart 1: Census Population

Source: Statistics Department

On May 12, 2001 the population of Montserrat was 4,491. This represents a forty-two percent (42%) decline in the population since the last Census in 1991. Of the 4,491 persons present at that time, 2,418 (54%) were males and 2,073 (46%) were females.

The population groups enumerated included persons living in private households (4,303); persons living in institutions eg. hotels, homes for the elderly, the prison (181), and persons with no fixed place of abode (7).

The *resident population*, defined as those persons who indicated that Montserrat was their usual place of residence was 4,465. There were 2,405 males and 2,060 females.

DEFINITIONS

De facto population: The number of persons present on Montserrat as at midnight May 12, 2001.

Enumeration District: An Enumeration District (ED) is a defined geographical area. Montserrat was subdivided into 20 Enumeration Districts namely:

Isles Bay	Olde Towne	Olveston
Friths/Flemmings	Salem, East	Salem, West
Woodlands	St. Peter's	Banks/Nixons
Cudjoe Head	Brades	Davy Hill South
Davy Hill North1	Davy Hill North 2	Geralds
Drummonds	St. John's/Mongo Hill	Judy Piece
Barzeys	Look Out	

Private household: A private household consists of one or more persons living together and sharing at least one daily meal.

It is important to note that a member of a household need not be a relative of the main family. For example, a domestic servant who sleeps-in, most nights of the week, is a member of the household. It is possible for a household to consist of one person, or of more than one family, as long as they share living arrangements. A group of unrelated persons living together can comprise a household.

Head of Household: The head of the household is the person recognised as such by the respondent. It is important to note that the head of household must have been present on Montserrat as at midnight May 12, 2001.

Institution: An institution is defined as any establishment where persons dwell collectively for similar reasons. These may be disciplinary, military, health, or vacation purposes.
